

J6898(C)

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

1. (currently amended) A combination toilet bar, comprising:
  - a. about 50 to 80% by wt. of soap(s) wherein the soap(s) contain 15.6 – 24.9% by wt. of oleic soap;
  - b. about 1 to 5 % by wt. of amphoteric surfactant(s);
  - c. about 1 to 5 by wt. of synthetic anionic surfactant(s);
  - d. about 0.1 to 10 % of hydrophobic emollient(s) with a titer point between about 1 to 80 C other than a hydrocarbon with a titer less than about 50 C;
  - e. greater than about 0.1 to less than 2% by wt. of a hydrocarbon with a titer less than about 50 C;
  - f. wherein the ratio of synthetic anionic surfactants to amphoteric surfactant(s) is in the range of about 1 to 5 to 5 to 1; and
  - g. less than about 15% by wt. water.
2. (original) The bar of claim 1 wherein the synthetic anionic surfactant has a Krafft point of less than about 30 C.
3. (original) The bar of claim 1 further comprising C<sub>12-18</sub> normal alkyl sulfonated methyl ester(s).
4. (original) The bar of claim 1 further comprising a Lathering Index Ratio of more than about 0.8.

J6898(C)

5. (original) The bar of claim 1 further comprising cationic polymer(s).
6. (original) The bar of claim 1 further comprising a pH of in the range of about 8.5 to 10.0.
7. (original) The bar of claim 1 further comprising a safe and effective amount of at least one active agent, a hydrophilic moisturizing agent or blend thereof.
8. (original) The toilet bar of claim 1 wherein the soaps include a blend of C<sub>6</sub> to C<sub>22</sub> alkyl soaps.
9. (original) The bar of claim 1 further comprising water in the range of about 1 to less than about 15% by wt.
10. (currently amended) A method of skin treatment and/or cleansing with a combination toilet bar, comprising the steps of:
  - a. wetting the mild bar with water; the bar including:
    1. about 50 to 80% by wt. of soap(s) wherein the soap(s) contain 15.6 – 24.9% by wt. of oleic soap;
    2. about 1 to 5% by wt. of amphoteric surfactant(s);
    3. about 1 to 5 by wt. of synthetic anionic surfactant(s);
    4. about 0.1 to 10 % of hydrophobic emollient(s) with a titer point between about 1 to 80 C other than a hydrocarbon with a titer less than about 50 C;
    5. greater than about 0.1 to less than 2% by wt. of a hydrocarbon with a titer less than about 50 C;

J6898(C)

6. wherein the ratio of synthetic anionic surfactants to amphoteric surfactant(s) is in the range of about 1 to 5 to 5 to 1; and
- b. rubbing the wet bar on the skin to deposit the emollients and/or skin active ingredients while cleansing the skin.
